

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in this application.

**Listing of Claims:**

1. (Currently Amended) A light emitting display comprising:  
a first addressing electrode;  
a second addressing electrode; and  
a nanomorphiic material layer having at least one non-polymeric organic compound positioned between the first addressing electrode and the second addressing electrode.
2. (Currently Amended) The light emitting display according to Claim 1, wherein the nanomorphiic material is a first non-polymeric organic nanomorphiic material adapted to luminesce at a first wavelength.
3. (Currently Amended) The light emitting display according to Claim 2, further comprising:  
a second non-polymeric organic nanomorphiic material positioned between the first addressing electrode and the second addressing electrode in a location other than a location of the first organic nanomorphiic material, the second organic nanomorphiic material being adapted to luminesce at a second wavelength.
4. (Currently Amended) The light emitting display according to Claim 3, wherein the first non-polymeric organic nanomorphiic material has an equivalent chemical composition when compared to the second organic nanomorphiic material.
5. (Currently Amended) The light emitting display according to Claim 3, the first non-polymeric organic nanomorphiic material having a first chemical composition, the second organic nanomorphiic material having a second

chemical composition, wherein the first chemical composition does not equal the second chemical composition.

6. (Cancelled)

7. (Cancelled)
